Workbook

21/22

From the heart of the Alps to the world's highest peaks.

 **contour**[®]
climbing skins made in Austria

contour is the culmination of more than 40 years of experience in the development and manufacturing of climbing skins. Back in 1975, we started manufacturing them ourselves in our family-run business in Tyrol.

100 % "made in Austria", contour climbing skins have proven performance in the harshest conditions throughout the world, whether in ski mountaineering competitions or simply skinning up the local slopes.

latest generation adhesive technology

hybrid is the first-ever twin layer adhesive technology for climbing skins. The upper layer sticks the skin firmly to the ski even at low temperatures. It is easy to remove and does not leave any residue on the ski base. The lower layer binds the upper layer of adhesive to the skin backing.

The result: hybrid technology combines the qualities of hot-melt skins and 'glue-less' skins.

- minimal effort required to separate adhesive sides from each other
- effortless removal from the ski
- no more re-gluing needed; simply wash the adhesive layer to restore tackiness
- perfect ski base adhesion on multiple ascents
- excellent tack even at very low temperatures

Quick and easy customisation: All contour hybrid trimmable skins feature our easytrim fit system for simple, easy customisation using the offset hybrid cutter. The clever bit is: we've split the backing foil lengthways into 3 strips.

So, when applying the skins to trim them, it is only the central strip of the backing foil that is removed. Leaving the backing foil in place over the edges makes it smoother and neater to trim them with the offset hybrid cutter. The metal ski edges stay clear and repositioning the skin is no longer necessary. Then all that's left to do is remove the two outer strips of backing foil and you're done.

backing film is split into
three sections

offset cutter, included
with all hybrid skins

hybrid pure 100 % Mohair

The gold standard in climbing skins.

Made with **100%** mohair plush for superior glide performance, these skins are perfect for lengthy, demanding tours. And thanks to the hybrid adhesive technology they are super easy to handle and provide excellent tack even on multiple ascents.

It's the little details that make the difference:

- Quick and easy customisation: All hybrid trimmable skins feature our easytrim fit system for simple, easy customisation using the hybrid cutter, included with each pair of skins.
- The tail clip sits flush, even on rounded ski tails. For tails that are thicker than 5 mm we recommend using the 'wide' tail clip.

Trimming set includes offset cutter, cleaning wipes and stuff sack with microfibre cloth to clean and dry ski base before applying skins.

Universal length: The skins come with tip fixes plus tip buckles in a choice of two different widths. This means you can cut the skins down to the right length and select the appropriate tip buckle for your skis. The rivets are easy to affix using a hammer.

PFOA-free impregnation to prevent water absorption and clumping

hybrid mix Mohair blend

Our classic all-rounder.

The mixed mohair plush ensures maximum durability and good glide performance. And the hybrid adhesive technology means they are super easy to use.

It's the little details that make the difference:

- Quick and easy customisation: All hybrid trimmable skins feature our easytrim fit system for simple, easy customisation using the hybrid cutter, included with each pair of skins.
- The tail clip sits flush, even on rounded ski tails. For tails that are thicker than 5 mm we recommend using the 'wide' tail clip.

Trimming set includes offset cutter, cleaning wipes and stuff sack with microfibre cloth to clean and dry ski base before applying skins.

Available in fixed lengths* or an adjustable version.

Universal length: The skins come with tip fixes plus tip buckles in a choice of two different widths. This means you can cut the skins down to the right length and select the appropriate tip buckle for your skis. The rivets are easy to affix using a hammer.

hybrid Free Mohair blend hybrid FAT Free

THE ultimate freeride skin.

hybrid free and FAT free skins boast all the qualities you look for in your freeride kit: small pack size, transferable to a range of skis, minimal maintenance. These skins can be adjusted by up to 10 cm in length and are designed for skis with a minimum waist of 95 mm. This means they can be used across several pairs of skis.

The hybrid FAT free is the natural progression of our free climbing skins for extra-wide freeride skis (waists >108 mm). With two wider strips for extra traction, the hybrid FAT free skins can tackle tough ascents on the fattest of skis.

Including hybrid cleaning wipes and stuff sack with microfibre cloth to clean and dry ski base before applying skins.

Choice Splitboard Camps

In winter 2020/2021, the Choice Company enters its eighth season. Choice Splitboard Camps offer an all-round package for action-packed splitboard adventures.

Under the guidance of an accredited mountain guide and always accompanied by a photographer, participants will go in small groups on an expedition to the remotest backcountry in Austria over a total of five weekends. All snowboarders who have already had some powder snow experience and basic fitness are welcome to participate in Choice Splitboard Camps. Skiers who have their own touring equipment are welcome at all camps. The camps are divided according to levels of difficulty from 1 to 4. Whether you want to stay at a self-catering hut or in a four-star hotel, the choice is all yours! And the best thing about it: At all camps, you can test the latest splitboards from Jones and Never Summer, bindings from Spark R&D and Karakoram and of course the latest contour skins for free.

“Choice stands for maximum freeride fun and safety first”, states Pia Schroeter, founder of Choice. “The camps bring like-minded people together. Participants become friends, and everyone who takes part becomes a member of the Choice family.”

the
choice
COMPANY

Mohair, the shorn wool of Angora goats ...

... is the basic fibre used for all of our skins.

Being one of the most unique natural fibres available, Mohair has excellent properties for climbing skins.

With a diameter of just **0.03 mm** and hollow inside, Mohair is extremely fine yet highly robust and durable. It remains supple and effective even in the coldest temperatures. The Mohair yarn is produced in compliance with the Mohair Sustainable Guidelines.

100% Mohair with superior glide performance is used in hybrid pure, guide and race skins.

The hybrid mix, hybrid free, guide mix and easy skins are made of **65% Mohair / 35% synthetic blend** and offer not only good glide performance but also very high abrasion resistance.

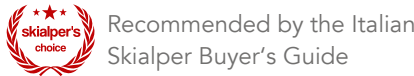

guide race race Mohair

Ultra-lightweight – the go-to choice for top athletes all over the world.

Combining both outstanding glide and climbing performance, these race mohair plush skins are specifically designed for racing, with tip attachments to fit all race skis with a notch.

The skins lie perfectly flush in the tip area to prevent snow ingress and are lightning fast to remove.

Recommended by the Italian Skialper Buyer's Guide

PROTECT OUR WINTERS

Climate action rooted in winter sports

Pro-snowboarder Jeremy Jones started the Protect Our Winters (POW) movement in 2007. As a professional athlete, he had first-hand experience of the effects of climate change on the mountain environment. He was keenly aware of the part that winter tourism had to play in it, but also of the opportunities it presented.

POW seeks to increase awareness of climate change and spur the winter sports community into action on climate change and nature conservation. Education initiatives, the formation of interest groups and the support of regional projects are an integral part of this. By partnering up with regional tourist boards, businesses, event organisers and other initiatives,

The POW movement is now represented in the USA, Sweden, Norway, Finland, France, England and Switzerland. POW Austria was founded in 2015. Aside from contour, POW Austria is also partners with klean kanteen and Blue Tomato.

guide pure 100 % Mohair

Classic mohair plush skin.

These are very lightweight skins for extended, demanding ski tours with the proven performance of traditional hot-melt adhesive technology.

- The tip fix connects skins firmly to the tip buckle. The skins cover the ski base as close as possible to the tips of the skis, which prevents snow ingress.
- The tail clip sits flush, even on rounded ski tails. For tails that are thicker than 5 mm we recommend using the 'wide' tail clip.

Guide pure trimming set includes trimming tool, backing foil and stuff sack.

Available in fixed lengths* or an adjustable version.

guide rent Mohair blend rent

The solution for the diverse requirements of rental use.

Ski touring is a trend sport! The demand in high-class rental equipment is increasing enormously. The completely newly developed guide rent skins stand out due to their particularly wear-resistant mohair blend material in the new "curry" colour as well as the various attachment options and the proven performance of traditional hot-melt adhesive technology.

- Due to the vario clip at the tip, buckles of various widths, z-buckles (for skis with holes, such as Fischer/K2) or race rubbers (for skis with a notch, such as Dynafit) can be used and easily exchanged without any tools. Wire buckles (85 mm width) are included, other options are available as accessories.

- The tail clip sits flush, even on rounded ski tails. For tails that are thicker than 5 mm we recommend using the 'wide' tail clip.
- Trimmable, width 115 mm. Cut to length, but can be adjusted as needed.
