A Story of American Ingenuity

West Coast Corporation founder W.R. Lummis invented the Original KEY-BAK® Self-Retracting Key Reel in 1948. As a switchman on the Pacific Electric Railway in Los Angeles, he saw brakemen and switchmen injured when their dangling key chains were caught on moving trains.

Lummis had an idea for a reel that would keep keys within reach at the wearer's side, safe from snagging on moving rail cars and machinery. His idea became the first KEY-BAK®.

Over 70 years after the first KEY-BAK® was produced, millions are in use worldwide in more than 20 different professions. West Coast Corporation continues as a solid, employee-owned, American company, creating high-quality products people depend on daily.

SPLIT RING

"My honest option about this little guy...I work in the IT industry and have a badge that unlocks doors. I had previously been using cheap retractable reels that kept wearing right through the nylon string. This reel has a strong cord with a strong reel to zip back your light weight attachments. I'd recommend this to anyone who wants a good reel for your badge or a few keys. This is high quality American-made."
- AJ

INTEGRATED CARABINERS

Heavy-Duty glass reinforced ABS case makes this carabiner ideal for anything.

Comes with Tough Kevlar® cord

Large carabiner has three retraction forces ranging from 8 oz. to 20 oz.

Small carabiner has 6 oz. retraction force and includes built in stainless steel bottle opener.

Split ring end fitting securely holds keys and protects electronics, tools and gear.

"This is the best clip. I used it to attach my walkie talkie to my belt loop. Makes it easily assemble and love the retracting ability. Just what I was looking for since my original walkie clip broke and the replacements don't stay on. That clip has been a life saver." -RAZ

TOOLMATE™ TOOL TETHERS

With only minimal retraction force, the ToolMate™ self retracting tool tethers keep the tethers as short as possible while not making the tool more difficult to use, solving snagging and entanglement problems suffered by non-self retracting tool tethers.

Certified to ANSI-121

ToolMate™ retractable tool tethers are the first to be certified to ANSI/ ISEA 121-2018.

**ANSI
CERTIFIED**

Safety Features

To ensure the utmost in safety, we have included a tell-tale in the nylon strap. This quickly identifies if the unit has been compromised so it can be taken out of service.

3rd Party Tested

All KEY-BAK® PRO ToolMate™ units are tested and verified through a third party testing facility and they are tested to a 2:1 safety factor.

LIFETIME SERVICE POLICY

**With over 70 years in business, when we say
“Lifetime Service Policy,” we really mean it...**

“In 1980, I became a franchised Snap-On Tool dealer in the Chicago area. The first thing my field manager gave me was a KEY-BAK key reel for my delivery truck and keys. My first thought was, “How long will this new device last?”

Well, I am no longer a Snap-On dealer, but I have used my Original KEY-BAK retractor every day since then. It's been on my belt for 34 years!

Sadly, this past week the spring has failed and I will have to retire this fine tool. I am sorry that I ever questioned the quality of your device. It truly lasted longer than I ever could have imagined.” - C.N.
